### 8PR STEEL BELTED CONSTRUCTION

All of our Trail Blade SXS tires are made in world-class facilities, with industry-leading strength thanks to our steel belted construction.

### SIPING AND STUD PINS

Delivers elite traction and grip in rain, shine, or snow (especially when studded).

### AGGRESSIVE SIDEWALL TREAD

Upgrades the styling of any UTV and provides elite side biting grip when off-road to stand out from the crowd and stay ahead of the pack.

### LARGE SHOULDER BLOCKS

Provides exceptional traction in off-road conditions, similar to a mud-terrain, especially at lower air pressure.

### VERSATILE HYBRID PATTERN

Designed to perform on nearly any terrain, offering 90% of the performance of an M/T type tire while delivering a smooth, stable ride.

### INTEGRATED RIM PROTECTOR

Built in rim protectors on every Trail Blade SXS tire keeps rock rash on your aftermarket UTV wheels to a minimum.

## ATTURO TRAIL BLADE X/T

The Trail Blade X/T SXS is a hybrid pattern sitting between mud and all-terrain. It delivers 90%+ of the off-road capability of an M/T in mud, sand and rocks while delivering a smoother and more confident ride on hard-pack, loose dirt trails, and pavement. The smaller tread blocks and siping help in wet and snow traction, including the ability to be pinned for winter studs. With the same aggressive sidewall and tread elements you have come to expect from Atturo, the Trail Blade X/T SXS performs even better than it looks.

The Trail Blade BOSS SXS is a refinement of the hardcore off-road tire, which has competed in Ultra 4's King of the Hammers and SCORE's Baja series of races. The BOSS is designed for deeper mud, sand, and rocks. The exaggerated tread blocks push through any surface, and a high void ratio helps clear debris. The sidewalls include aggressive tread lugs and extra thick construction for puncture resistance. The Trail Blade BOSS SXS is a no-compromise off-road tire for the ultimate SXS experience.
