

GEOMAX MX14

14371

- Optimized tread blocks and tread design allows the MX14 to more effectively penetrate and scoop sandy/muddy terrain
- Increased knob height increases drive grip and traction
- Enhanced block angles and flexible support fins on the braking side of knob offer improved braking and slide control
- New rubber compound improves durability and increases traction through less knob flex
- New construction has an additional ply to improve the linearity of the sidewall stiffness and enhance damping and absorption performance
- Offered in a complete range of rear sizes from minis to big bikes
