## GEOMAX MX34

14644

### MX34 Features & Benefits

- New carcass material improves damping and absorption which allows the MX34 to maintain its performance up to 30% longer.
- A new rubber compound increases traction while maintaining durability.
- Front and rear tires feature a new Progressive Cornering Block Technology (PCBT Advanced) to improve grip while cornering and enhance feel and absorption.
- A new rear pattern with a 11% taller and 44% wider center block increases traction and control.
- An optimized front pattern provides enhanced traction and a better mud evacuation system.
- Offered in a complete range of sizes from minis to big bikes.
